

# CBT training for Government & industry

## MCWP user initial or refresher

**This course is applicable to personnel who are required to work from or use Mast Climbing Work Platforms for a range of workplace tasks, or for those required to supervise or manage others working from, or using, MCWP's in the workplace.**

This course addresses planning, risk management, routine safety & operational checks, unpowered descent, and emergency response for using MCWP's and associated equipment.

Training is contextualised for construction and maintenance workers.
