Equipment sales

The correct equipment for the job can increase safety, create efficiencies and promote confidence with the people required to use the gear.

Price is just one part of the equation, having confidence that your gear has been manufactured and tested to standards means selecting quality suppliers.

Your time is valuable, and it's hard to be across everything, as a supply partner we can add the value of having done the research to ensure you get the right goods, of good quality at a fair price.

We can provide you with a great range of gear to help you get your work done safely;

Height safety and rope access – harness, lanyards, abseil and haul ropes, karabiners, rope grabs, inertia reels, recovery reels powered access seats, rated nets, men and material winches

Roof access systems – anchors, safety lines, fixed ladders, platforms, stairways, handrails

Confined space – tripods, davit arms, winches, gas detectors, winches, work positioning kit

Industrial rescue kits – Harken Industrial Lokhead Winch, Austlift, Skylotec, Spanset

Emergency and rescue – stretchers and accessories, rescue ladder systems

Lifting – Synthetic slings polyester and UHMPE to 100t, chain slings, lifting devices, chain blocks, lever hoists, magnets

Load management – fork lift cages, pallet jacks, plate clamps, snatch blocks, beam trolleys and girder clamps, hand trolleys, electric vehicles and tugs

Load and cargo restraint /handling – nets, load binders standard and lever, webdogs, transport chain, truck winches, ratchet tie downs, boat tie downs, motorcycle tie downs, snatch straps, silver rope, corner protection, eye tow hook, rigging screws and turnbuckles, shackles, steel wire rope fittings

Architectural and balustrading – stainless steel wire rope and fittings

Water treatment – stainless steel davit systems, stainless steel chain and fittings

If you can't see it listed, chances are we already source it, just ask us.

We can arrange simple finance packages for larger system purchases.

Thought about hiring gear? We can arrange for you.

Consulting & service

Our services include roof access system design and layout, advice to architects and builders, system installation and repairs and system inspections and recertifications.

To assist you in maintaining compliance with WHS Regulations, we offer trained and competent staff to inspect, tag and test height safety, confined space and lifting equipment.

Our consultant advice service may save you thousands by ensuring your safety or load control equipment purchases are correctly suited to the task, accepted by your workforce and have the optimal life of ownership cost benefits.

Getting assistance with your industrial rescue plans, training plans, load control and safe height and depth access methods brings peace of mind knowing you are compliant with the relevant and current: Laws, Codes of Practice and Standards.
